		Habitat Operations Manager	Date
		AWC Project Biologist	Date
		GIS Analyst	Date

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
humpback whitefish	09/19/2025	✓		✓	✓

~EXTEND upper reach of HUMPBACK whitefish PRESENT in existing AWC Stream #330-00-10700 "Colville River".
~ADD species life-phase HUMPBACK whitefish SPAWNING to existing AWC Stream #330-00-10700 "Colville River".
~UPDATE/ADJUST hydrography segment around above observation point in existing AWC Stream #330-00-10700 "Colville River".
 Process Nom's #25-764 & #25-765 concurrently

Comments:

We caught six Humpback Whitefish (Coregonus pidschian) in spawning condition. All fish had tubercles on their head and had gravid eggs or milt, which was easily expressed when handling each Humpback Whitefish. Fish were caught while drift electrofishing in a raft. Fish were captured on an inside bend in clear water over cobble substrate and appeared to be holding in place. Numerous Arctic Grayling (Thymallus Arcticus) were stacked up immediately downstream of Humpback Whitefish and we captured 11 Arctic Grayling, which also seemed to be holding in place downstream of Humpback Whitefish.
 Coordinates (Lat,Long): Upper(69.30303,-152.45664) Lower(69.29970,-152.41331)
