**OBSERVATION INFORMATION**

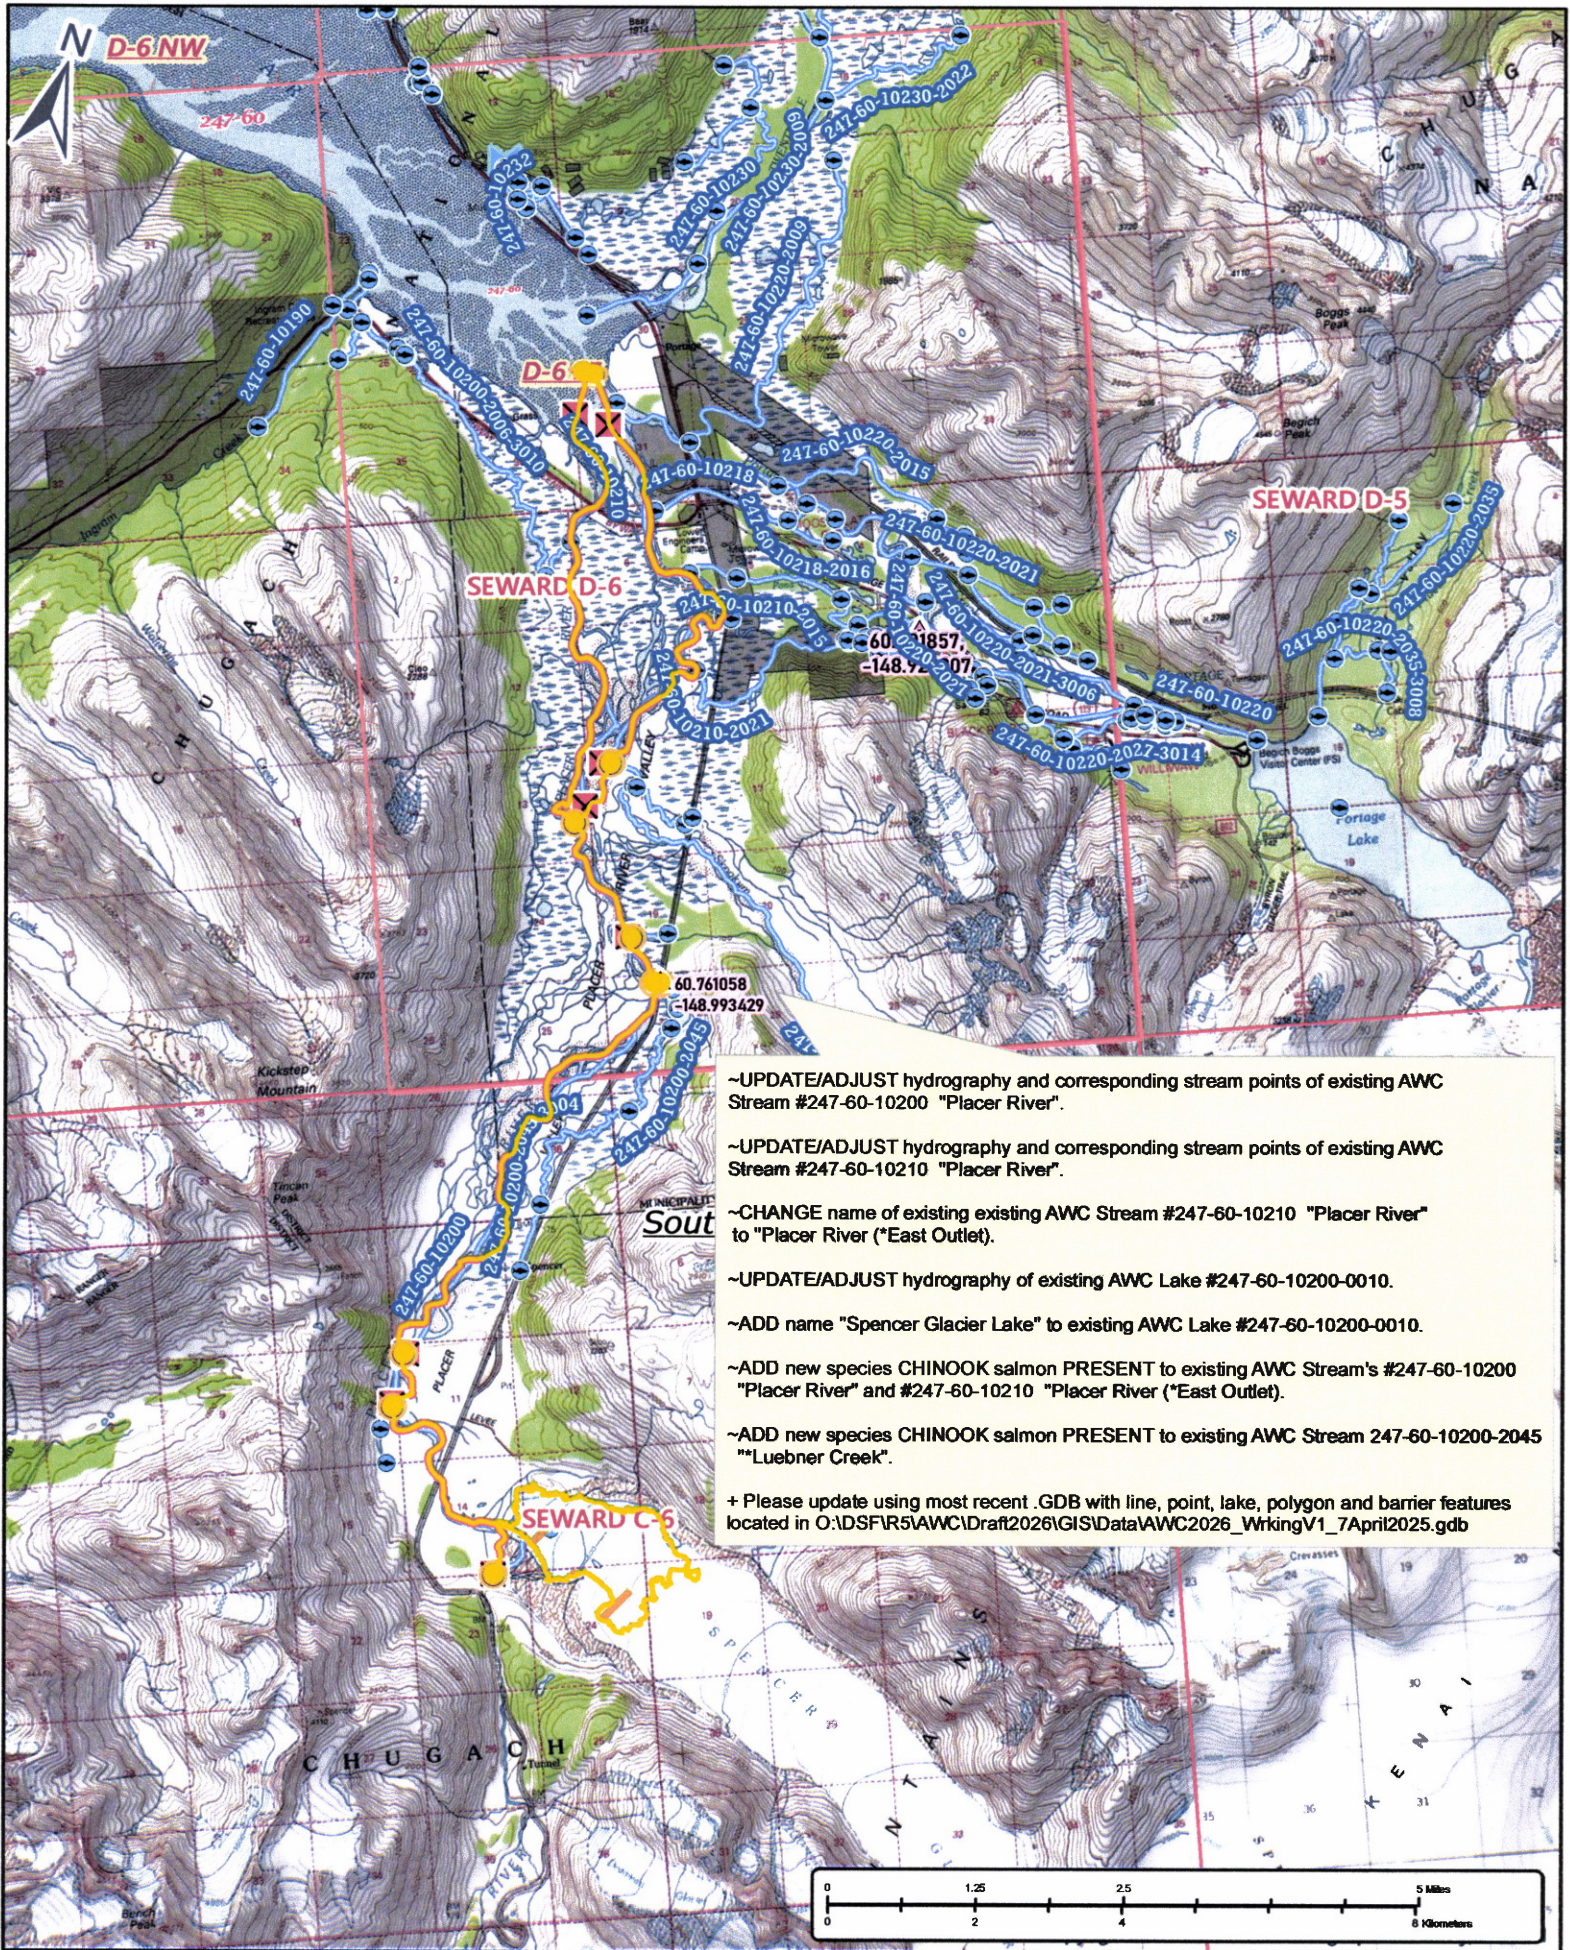

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
chinook salmon	07/20/2025			✓	✓

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**  
 Observed 3 king salmon adults in side channel of Luebner Creek, next to the railroad tracks. Arrived by jet boat, cut the engine and rowed towards fish after seeing wakes in the shallows. Approached quietly on the oars, which provided an excellent view at close range. All 3 were in spawning phase. 2 were heavily blushed, while 1 still had grayish chrome belly. Large spots on back and black jaws were distinct on each fish. 12-20 lb approximate weight. Fish were active and spooked into the main channel of Luebner Creek.  
 Coordinates (Lat,Long): Upper(60.761058,-148.993429) Lower(60.760706,-148.994006)
