**~ADD new AWC Stream #200-20-10080-2001 with COHO salmon REARING.**

**Comments:**  
 During August 23rd - 31st the US Forest Service Cordova Ranger District Fish Crew sampled this waterbody for coho genetics and as an entry into the AWC. Juveniles were caught using a 24' beach seine and adults were caught primarily by hook and line sampling.  
 At this location we made 4 stops and caught a total of 31 juveniles. The downstream reach of the stream was heavily brushed in and the upper reach was open meadow. No water body measurements were taken.
