While conducting presence/absence fish surveys in the Johnson River drainage, Beth Evers (ADFG) and I captured two large Dolly Varden in spawning condition with a backpack efisher at the point listed above. The DV measured approximately 350 and 325 mm and were paired up. This was in a braided section of the stream which was cutting a new channel through the alders. Dolly Varden have been captured further upstream in this creek at (60.08976, -152.80236). We have a stream course based on LIDAR and can provide that if it is helpful.
 Coordinates (Lat,Long): (60.08649,-152.80576)

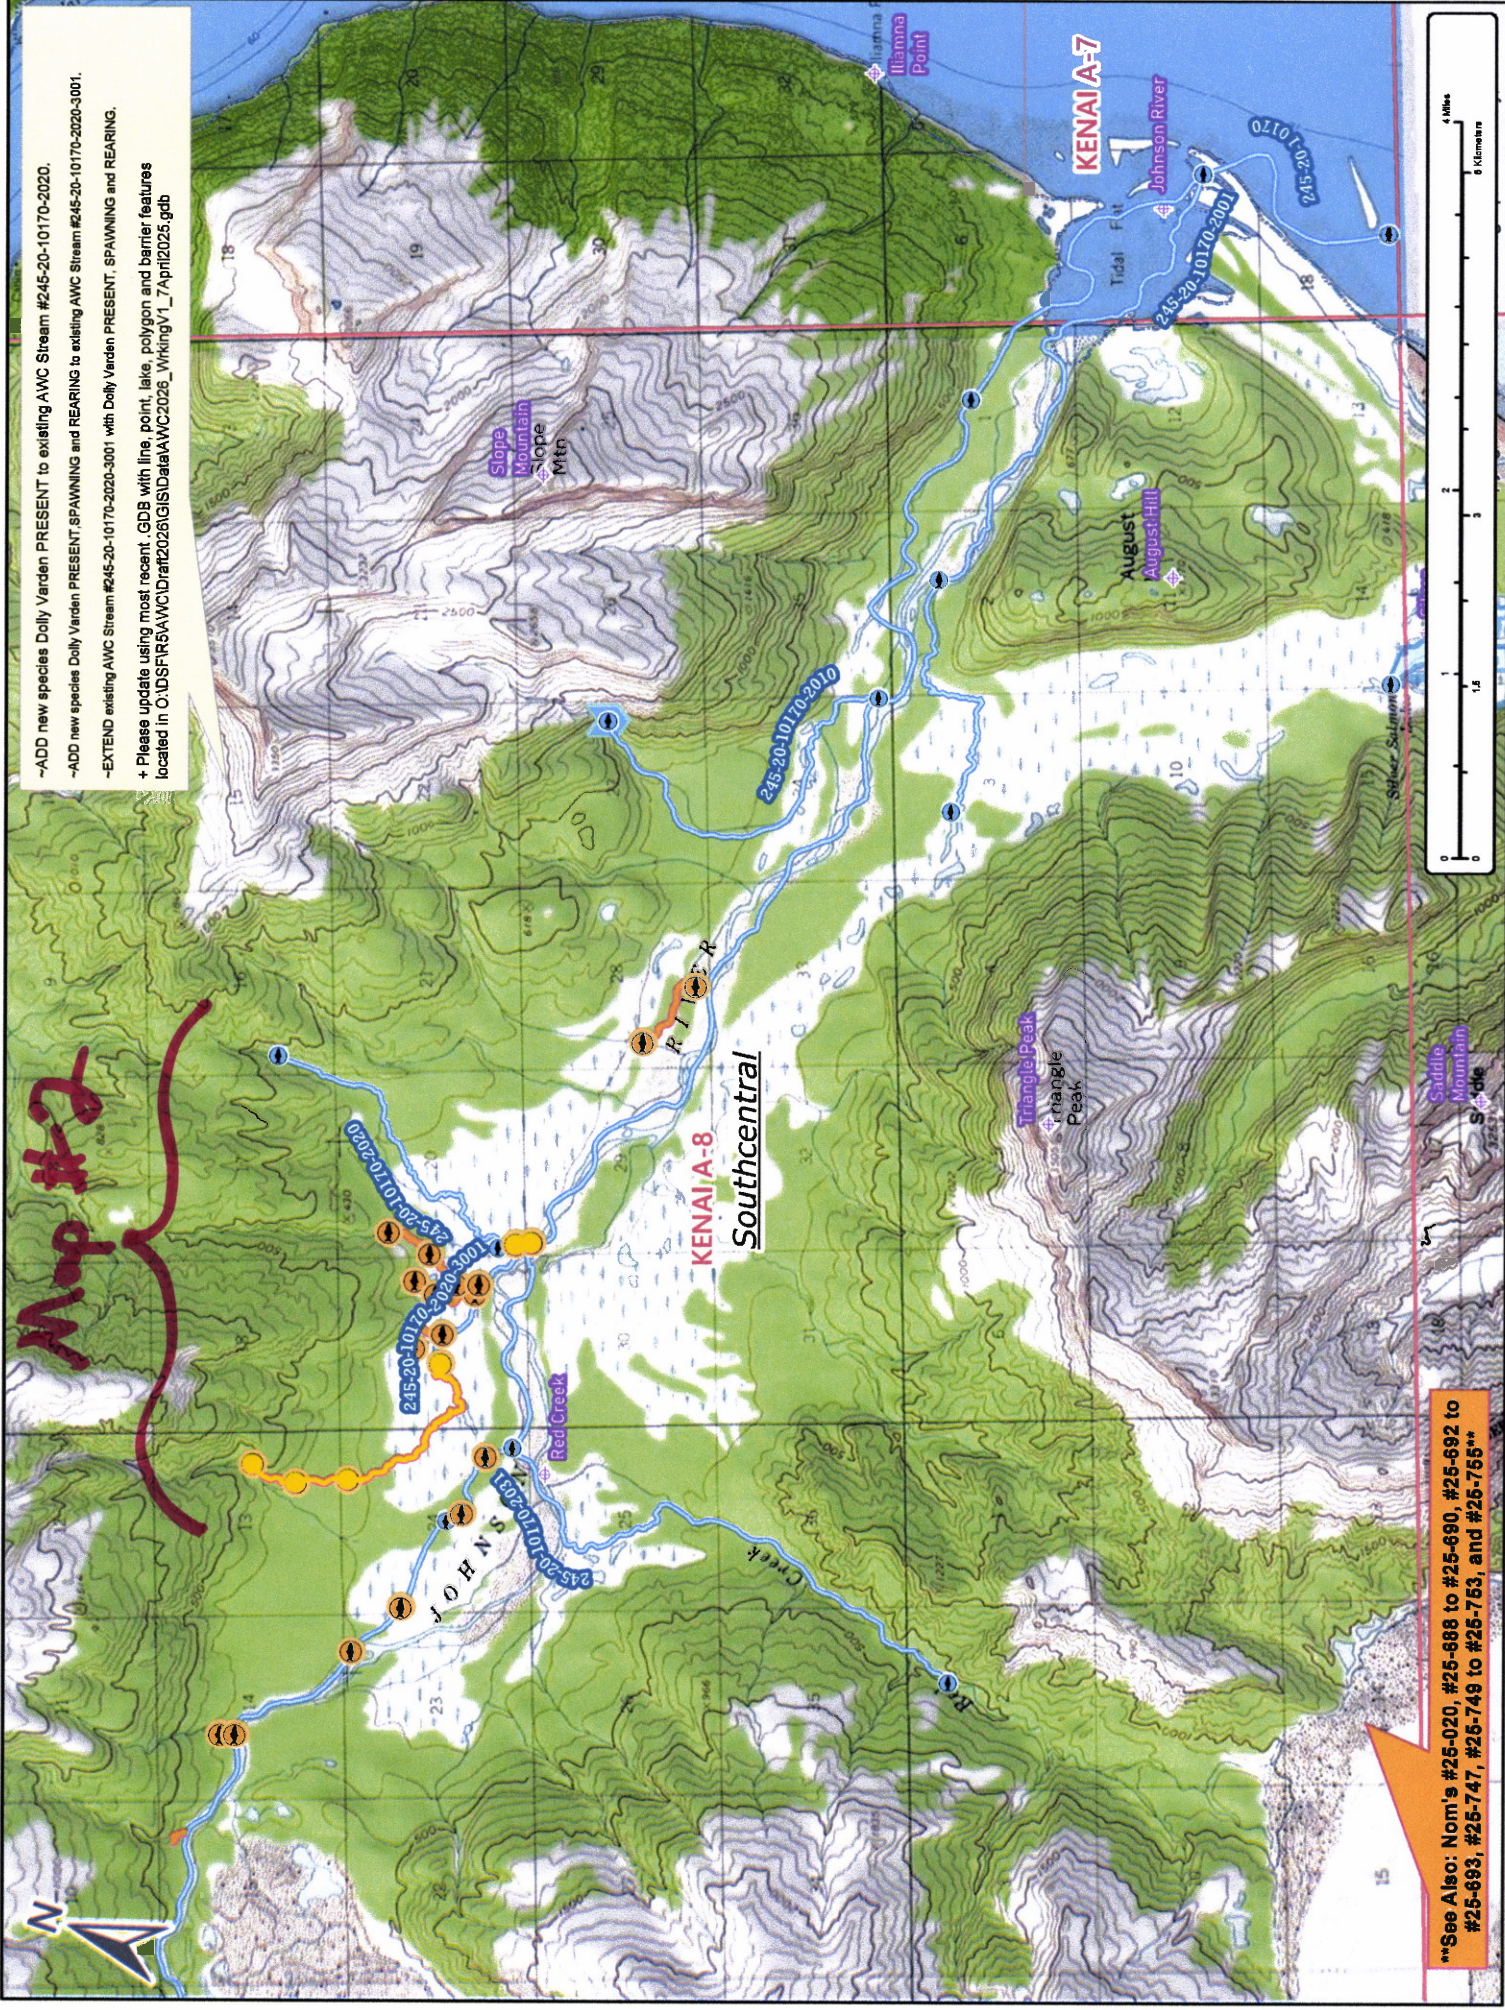

Name of Observer (please print): Josh Brekken
 Signature: 10.231.39.10 (Web Nomination) Date: 09/24/2025
 Agency: ADF&G
 Address: 333 Raspberry Road
Anchorage, AK 99518

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.
