ADDITION

Water body name:

Quad: Yakutat B-3

Upper Reach Latitude: 59.450024 **Longitude:** -139.057206

Lower Reach Latitude: 59.449865 **Longitude:** -139.060474

Survey date: 9/15/2024

Species & Lifestage: CO, DV

Survey crew: CD, FC

Findings: We surveyed this uncataloged stream from the road using baited minnow traps and GPS and captured juvenile coho salmon and Dolly Varden (Figure 1). The stream is low gradient through a beaver pond complex and the culverts are fully backwatered (Table 1; Figures 2, 3). Future investigation upstream is recommended though access upstream may prove difficult under wet conditions.

Recommendations: Add this uncataloged stream to the anadromous waters catalog for rearing coho salmon and Dolly Varden (Figure 4).

Nomination: Pending
