ADDITION

Water body name:

Survey date: 5/21/2024

Quad: Juneau A-4 and B-4

Species & Lifestage:

Upper Reach Latitude: 58.247727 **Longitude:** -135.182676

Survey crew: CD, DK, FC, NJ

Lower Reach Latitude: 58.245866 **Longitude:** -135.180796

Findings: We surveyed this uncataloged stream from the road using a backpack electrofisher, baited minnow traps, and GPS and captured juvenile coho salmon. The stream below the culvert is narrow with a moderate gradient and large cobble substrate present. Perched culvert at the road is likely hindering fish passage and sediment transport. Due to time constraints, no survey upstream was conducted (Table 1; Figures 1–3).

Recommendations: Add this stream up to waypoint 88 into the anadromous waters catalog for rearing coho salmon and Dolly Varden (Figure 4).

Nomination: Pending
