ADDITION

Water body name:

Survey date: 8/27/2025

Quad: Petersburg A-2

Species & Lifestage:

Upper Reach Latitude: 56.167567 **Longitude:** -132.571680

Survey crew: NJ, DK

Lower Reach Latitude: 56.166115 **Longitude:** -132.574945

Findings: We surveyed this uncataloged stream up to an anadromous fish barrier using a backpack electrofisher and GPS and captured juvenile coho salmon. The barrier is an 8 ft bedrock waterfall with no jump pool at its base, and a bedrock chute flowing downstream from there; this constitutes a permanent rock barrier. Below this, the channel becomes about 6 ft wide with primarily cobble and boulder substrate and provides ample rearing habitat for juvenile fish (Table 1; Figures 1–3).

Recommendations: Add this uncataloged stream to the anadromous waters catalog up to waypoint 1043 for rearing coho salmon and add a barrier point at waypoint 1043 (Figure 4).

Nomination: Pending
