## Eight Fathom Bight Uncataloged Stream 2

**ADDITION**

**Water body name:**

**Survey date:** 7/1/2024

**Quad:** Juneau A-6

**Species & Lifestage:**

**Upper Reach Latitude:** 58.005799 **Longitude:** -135.749460

**Survey crew:** FC, DK

**Lower Reach Latitude:** 58.006071 **Longitude:** -135.744267

**Findings:** We surveyed this uncataloged stream using a backpack electrofisher, baited minnow traps and GPS and captured juvenile coho salmon and cutthroat trout. Upstream of waypoint 826, the stream is incised as it flows off the hillside with a series of step pools that may restrict juvenile fish passage. Downstream of waypoint 826, the stream decreases in grade and flows out of the forest through a grassy supratidal area at 2-4% grade before flowing out into the intertidal. (Table 1; Figures 1-3)

**Recommendations:** Add this uncataloged stream into the anadromous waters catalog for rearing coho salmon from its mouth in the intertidal up to waypoint 825 (Figure 4).

**Nomination:** Pending
