Eight Fathom Bight Uncataloged Stream 3

ADDITION

Water body name:

Survey date: 7/1/2024

Quad: Juneau A-6

Species & Lifestage:

Upper Reach Latitude: 58.009544 **Longitude:** -135.747567

Survey crew: FC, DK

Lower Reach Latitude: 58.007696 **Longitude:** -135.743077

Findings: We surveyed this uncataloged stream using a backpack electrofisher, baited minnow traps and GPS and captured juvenile coho salmon, cutthroat trout and slimy sculpin. The stream has good quality spawning and rearing habitat for fish with a mix of large and small gravel, riffles and pools and small woody debris throughout the upper surveyed reach. Survey ended due to time constraints, but fish habitat continues upstream of waypoint 544 warranting future investigation. (Table 1; Figures 1–3)

Recommendations: Add this uncataloged stream into the anadromous waters catalog for rearing coho salmon from its mouth in the intertidal up to waypoint 544 (Figure 4).

Nomination: Pending
