**Comments:**  
 I used a baited minnow trap in a step pool to capture two juvenile coho salmon in Wilbur's Creek (Figures 1, 2, and 3). The pool was located at 57.87604, -152.68158. Dolly Varden, stickleback, and sculpin were present downstream in a still-water pond (Figure 4). The lower creek, upstream of the beach outlet is about 0.5 acre pond. Upstream of the pond the stream is riffle pool becoming steep gradient for about 50 meters, becoming riffle pool habitat.
