I used baited minnow traps in two step pools to capture 4 juvenile coho salmon in Wilbur's Creek (Figures 1, and 2). The pools are located at 57.87593, -152.68138 and 57.87609, -152.68146. About 5 natural mortality Dolly Varden were present downstream in a stillwater pond at 57.87641, -152.68149 (Figure 3). Two of the DV were measured at 300 mm FL. Upstream of the pond, the stream is riffle pool becoming steep gradient for about 50 meters, becoming riffle pool habitat. A 15-foot high beaver dam is located at the outlet of a 9 acre lake (Figure 4).
