and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:
Amber Stephens (ADFG) and I captured and observed fifteen coho salmon in this stream using a backpack efisher and net. The stream drains a wetland area and has been channelized along a road and is not in its natural location. Several Dolly Varden were also captured.
