Proposal 180

I authored this proposal. I want to amend it by removing the portion that exempts it from the non-resident quotas and keep this one permit for residents only. There can only be one permit by regulation. It has been residents only for 15 years, since there has been a separate draw quota for non-residents. I originally didn't think there would be many non-residents applying for it because of the extremely long odds of drawing it, over 3,200 to 1. The odds are much better for the non-resident permits that are already available. I have come to realize that the large application services could flood this hunt with non-residents applications and significantly reduce the odds for residents. I do not want that to happen. If you pass this proposal it would be a very special permit and opportunity that should remain for resident sheep hunters only.

Thank you board members for your consideration of this change to proposal 180.

Sincerely:

Dan Montgomery
